InstruMed MICROTOMSCHLIFF- "1A" SCHEREN

Durch ein Spezialverfahren wird eine Stahlhärte erreicht, die weit über der normaler Scheren liegt.

Die hohe gleichmässige Härte, die äusserst feine Politur und der **Microtom-Spezialschliff**, ermöglichen es uns Ihnen Scheren mit folgende Vorzügen anzubieten:

Microtomschliff

- extrem weicher, leichter und gleichmässiger Gang
- hohe Schneidequalität
- verbesserte Rostsicherheit
- hohe Säurebeständigkeit

Den grössten Teil, der in unserem Katalog abgebildeten Scheren, können wir Ihnen in dieser Qualität anbieten.

Bei einer Bestellung genügt es, wenn Sie an die Katalognummer **MSI** anfügen.

Zehennagelschere

Die Schere ist komplett aus Edelstahl gefertigt und mit angenehmen Griffen versehen.

Durch die langen, geformten Griffe ist diese Schere bequem und einfach in der Benutzung.

Reinigung: Einfach die Schere mit einem feuchten Tuch abwischen und gleich nachtrocknen.

InstruMed bietet speziel für Diabetiker Nagelzangen an.

Das besondere an diesen Nagelzangen sind die abgerundeten Kanten und Spitzen. Dadurch wird die Verletzungsgefahr auf ein Minimum reduziert.

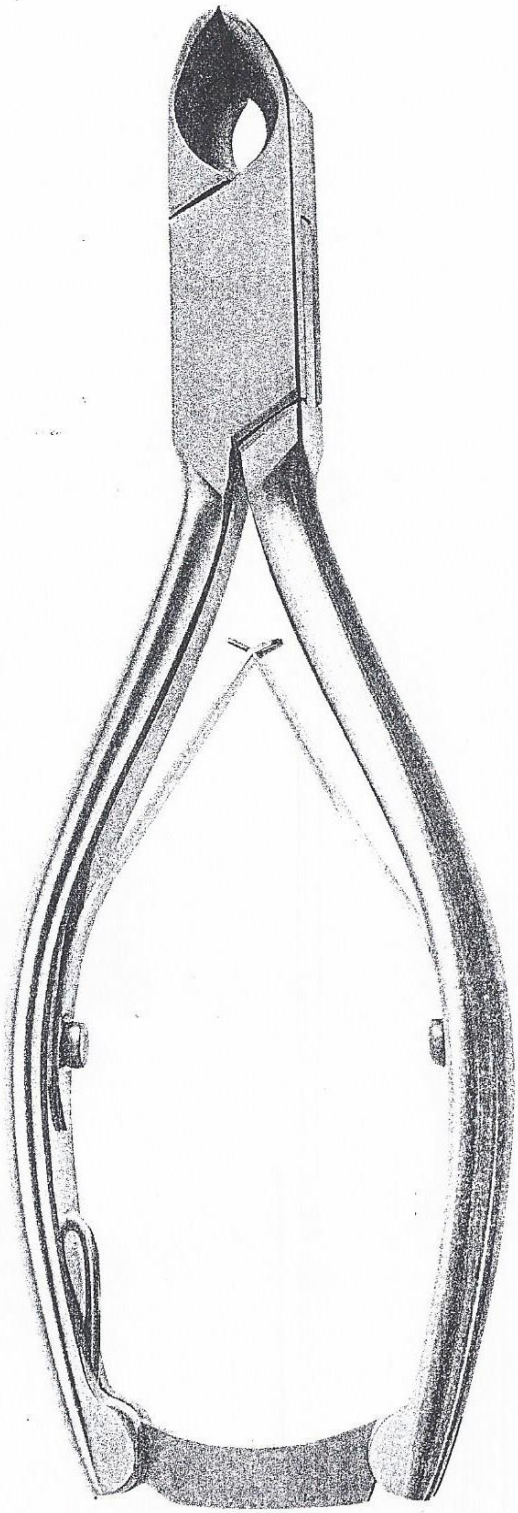

Für Rechts- und Linkshändler gleichermäßen geeignet.

Doppelübersetzte Nagelzange für DIABETIKER

130.15
15cm
Kopfschneidend

Diese Zange ist für harte und besonders dicke Fuß- und Fingernägel geeignet. Nagelecken lassen sich mühelos schneiden. Eine stabile Feder erleichtert das benützen der Zange und die karierten Handgriffe geben eine zusätzliche Griffsicherheit.

Für Rechts- und Linkshändler gleichermäßen geeignet.

Zu Ihrer besseren Information haben wir die Funktion der einzelnen Modelle durch Detailzeichnungen im Maßstab 1:1 dargestellt.

In the interests of clarity, we present the individual products and their functions in the form of detailed, full-scale drawings.

Pour une meilleure information, nous avons représenté la fonction des différents modèles par des dessins détaillés à l'échelle 1:1.

A fin de facilitarles una óptima información, hemos ilustrado la función de cada uno de los madelos en dibujos de detalle a escala de 1:1.

Per fornirVi informazioni più precise abbiamo riportato le funzioni dei singoli modelli in illustrazioni dettagliate in scala 1:1.

Alle Instrumente werden aus rostfreiem Stahl (Werkstoff-Nr. 1.4024) hergestellt. Die Pinzetten sind gehärtet (HRC 40-45) und elektropoliert.

All instruments are made of stainless steel (material No. 1.4024). Forceps are hardened (HRC 40-45) and electropolished.

Tous les instruments sont fabriqués en acier inoxydable (No. de matériau: 1.4024). Les pinces sont trempées et subissent un polissage électrique.

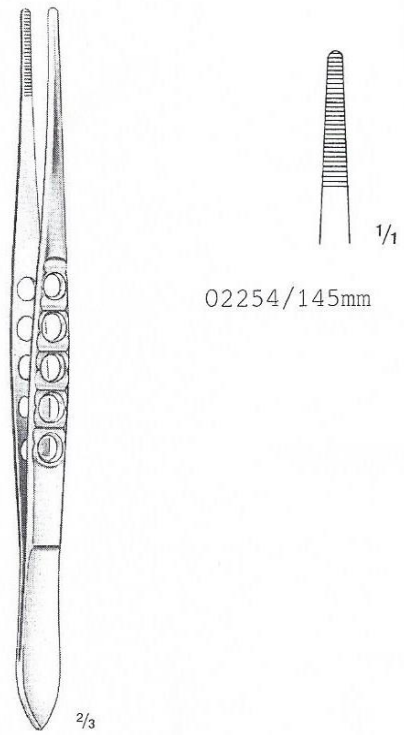

Todos los instrumentos son fabricados partiendo de acero inoxidable (No. de material: 1.4024). Las pinzas han sido expuestas a un tratamiento térmico (HRC 40-45) y a un pulido electrolítico.

Tutti gli strumenti vengono prodotti in acciaio inossidabile (codice del materiale: 1.4024). Le pinze sono temprate (HRC 40-45) e lucidate elettrochimicamente.

Wundhaken-Halter

OCTOPUS

Täglich im In- und Ausland eingesetzt und tausendfach bewährt

Hektik während Operationen ist gefährlich. Der Operateur braucht Ruhe, Sicherheit und Bewegungsfreiheit. Assistenzpersonal soll sinnvoll eingesetzt werden.

Warum mit OCTOPUS operien?

- Freies Operationsfeld, ungestörtes Arbeiten.
- Fixieren in jeder gewünschten Position.
- Kein Abkippen oder Nachgeben der eingestellten Wundhaken durch Ermüdung des Assistenten.
- Einfache und schnelle Einstellung durch Zentralgelenk.
- Beide Hände des Assistenten bleiben für die eigentliche Assistenz frei.
- Der Operateur stellt den OCTOPUS nach seinen Wünschen selbst auf das Operationsfeld ein. Das Übergeben des Wundhakens vom Operateur in die Hand des Assistenten fällt weg, dadurch verkürzt sich die Operationszeit um 1/4 bis 1/3 der Normalzeit.

Der OCTOPUS ist durch die Elastizität des Auslegerstabes imstande, den kleinsten Bewegungen des Patienten zu folgen (Atembewegungen), ohne statischen Druck am Gewebe auszuüben. Besonders wichtig für die Parenchymorgane, wie zum Beispiel die Leber. Physiologische Behandlung des Gewebes.

Gegenüber allen Wundhakenhaltern mit Rahmen, die im Druck auf das Gewebe voneinander abhängig sind, bietet OCTOPUS mit seiner separaten Befestigung eines jeden Armes am Tisch eine vollständig von den anderen Armen unabhängige Arbeitsweise. Der Druck des Wundhakenhalters am Gewebe ist von wenigen Grammen bis ca. 12 Kilogramm durch schwächeres oder stärkeres Anziehen des Zentralgelenkes einstellbar. Jeder Arm arbeitet für sich selbständig.

Nr.560002 Typ Standard mit kurzem Auslegearm 43cm mit Universalsockel
Nr.560001 Typ Standard mit langem Auslegearm 56cm mit Universalsockel
Nr.560003 Typ Hydra/Doppelkopf mit langem Auslegearm 56cm mit Universalsockel

Zylindrisch angeordnete und hinterschliffene Schneiden ermöglichen wirkungsvolle Probeentnahme ohne tiefe Verletzung.

Geringe Dilatation und größtmögliche Schonung der Cervix.

Abgerundete Kuppe verhindert Gefahr einer Perforation.

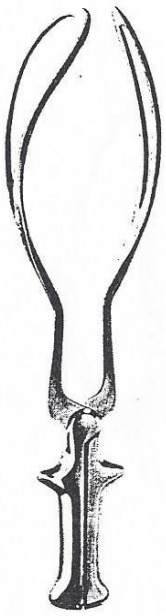

Cylindrical and undercut edges guarantee an efficient tissue sampling without deep scraping.

Only minimum dilation and utmost protection of cervix.

Rounded tip avoids danger of perforation.

Die charakteristische S-Form der Schumacher-Zangen gewährleistet freie Sicht und scharf begrenzte Ausschnitte.

The S-shaped construction of the Schumacher forceps allows clear view and sharply-delineated excisions.

Vorteile der Schumacher-Zangen:

Sicheres Erfassen des Gewebes aufgrund des Anhake-Effekts.
Großer Öffnungswinkel.
Glatter, ziehender Schnitt.
Proben werden nicht gequetscht.
Nicht schmerzhaft, selbstschließende Wunde, gute Heilung.

Advantages of the Schumacher forceps:

More reliable grip on the tissue due to new "hooking" effect.
Wide angle of opening.
Smooth, steady cut.
Specimens are not squashed.
Not painfull, self-sealing wound, heals well.

Anwendungsgebiete:
Orthopädie, Rhinologie, Hand- und Kieferchirurgie, sowie alle Bereiche in denen vom Chirurgen eine scharfe Raspel gefordert wird.

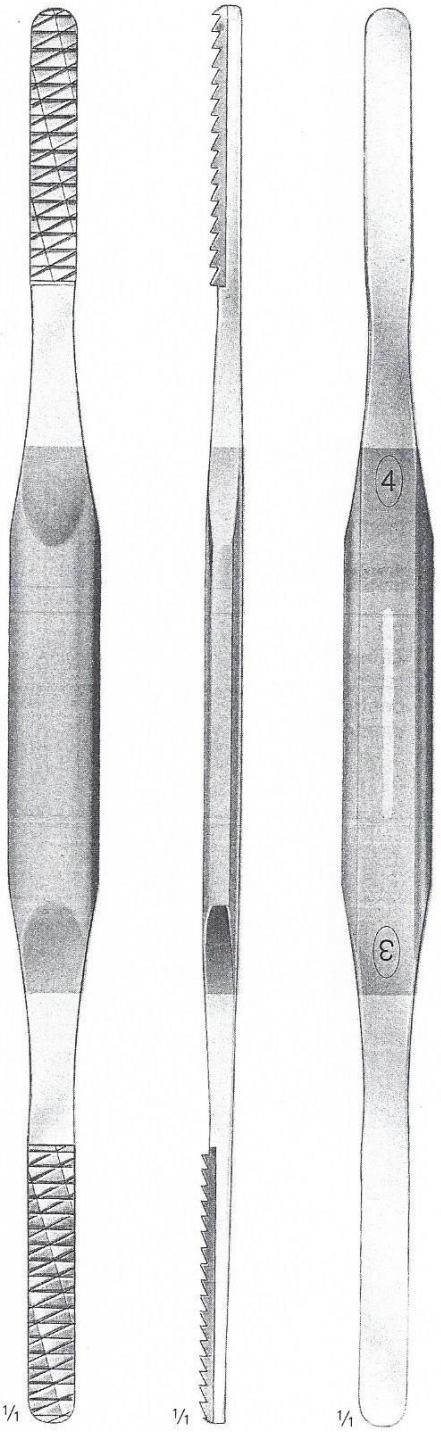

Recommended for use in:
Orthopaedics, Rhinology, Hand and Maxillary surgery, and for all fields in which a sharp rasp is needed.

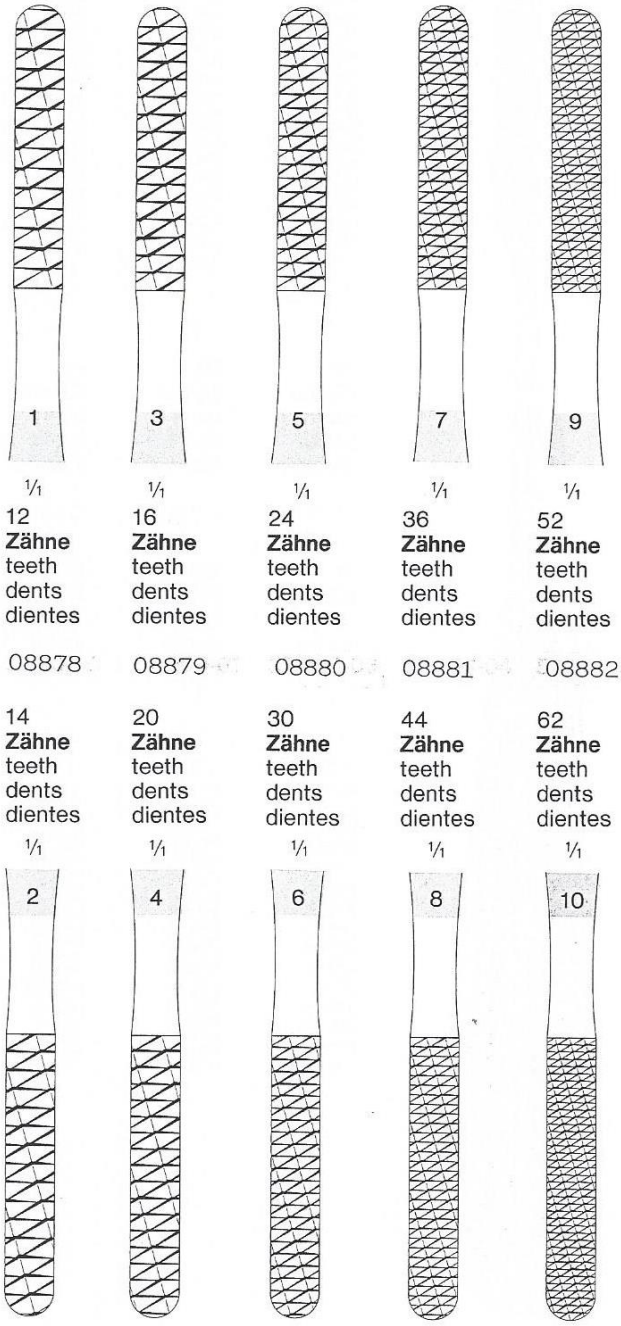

Recommandées pour:
L'orthopédie, la rhinologie, la chirurgie de la main et du maxillaire, et toutes les disciplines pour lesquelles une râpe tranchante est nécessaire.

Campos de aplicación:
En cirugia ortopédica, rinológia, de mano y maxilo facial, asimismo para los campos en los cuales requiere una raspa aguda.

ANTI-HAFT BIPOLAR PINZETTEN

NON-STICK BIPOLAR-FORCEPS

Die NON-STICK Bipolarpinzetten verfügen über eine "massive" Spitze aus Sterlingsilber. Dieses Material ist in der Lage, die beim Koagulieren entstehende Hitze schnell abzuleiten. Dadurch kann sich die Spitze nicht so schnell erhitzen und somit das Anhaften von Gewebe verhindern.
Der zusätzliche Goldüberzug der Silberspitze bietet noch folgende Vorteile:
-Gold hat eine noch bessere Leitfähigkeit, Hitze wird noch schneller abgeleitet
-Gold hat eine antibakterielle Wirkung und ist das einzige Metall, auf dem sich keine Bakterien ansiedeln können
-durch den Goldüberzug läuft die Silberspitze nicht so schnell an
-Gold ist sehr beständig gegen Säuren und Laugen
